PLANVIEW Enterprise

Extend the Power of PlanView Enterprise

PlanView Enterprise[™] is designed to help organizations like yours better align work efforts with business goals through comprehensive portfolio management.

As an added benefit, PlanView Enterprise can now be used with EMC Documentum eRoom[™], the industry's leading solution for enterprise-wide collaboration. Easily integrated with PlanView Enterprise, eRoom provides a rapidly deployed and easily adopted Web-based workplace where distributed teams can work together closely and efficiently, helping to sharpen your organization's competitive edge for today's markets.

Complementing the structured portfolio management of PlanView Enterprise, eRoom enables team members in different locations to develop, gather, track and share a wealth of unstructured data involving strategies, processes and projects. This data can range from internal meeting notes, text documents and discussion strings to Web pages, charts and presentations.

EMC Documentum eRoom supports high-performance, fast-cycle collaboration that can help you optimize resources, improve decision making, accelerate development and enhance the delivery of products and services.

Let's take a look at some of the many benefits available with an EMC Documentum eRoom solution integrated with PlanView Enterprise.

Capture and Expedite Strategic Planning Decisions

Managers and team leaders can easily generate a complete record of planning decisions in a variety of formats. All team members are kept fully informed through real-time and scheduled notifications

of milestones, developments and issues requiring immediate actions. Team leaders can quickly configure a multi-step approval process to get sign-off on important, time-sensitive documents and deliverables. Better collaboration with eRoom can lead to improved planning and execution, even with large projects supported by multiple teams.

Improve Performance With Tight Collaboration Among Virtual Teams

Virtual teams can work together closely for greater productivity, knowledge sharing and reuse of best practices. Enterprise teams can also collaborate with external entities such as partners, suppliers, customers and clients.

EMC Documentum eRoom works with PlanView Enterprise in seven key areas, enhancing overall portfolio management through improved collaboration.

PlanView Enterprise is a comprehensive IT portfolio management solution that optimally balances the supply of IT resources with business demands. It maximizes business value by applying best practices and portfolio management disciplines to strategies, projects and the delivery of business services.

The Best of Both Worlds

PlanView Enterprise and EMC Documentum eRoom combine the benefits of structured portfolio management and flexible, enterprise-wide collaboration:

- Improved collaboration, communication and cooperation across teams and projects across the globe
- Faster and more flexible idea generation, problem solving, consensus building and issue resolution
- Better knowledge-sharing and reuse of knowledge base
- Enhanced stakeholder communications and involvement within and among teams
- Improved governance and auditability

"Our research reveals that project, line and organization leaders would welcome a seamlessly integrated set of tools to archive, retain and review both structured and unstructured data."

-Collaborative Strategies

EMC Documentrum eRoom integrates easily with PlanView Enterprise for enterprise-wide project collaboration.

Capture and Track Key Benefits Throughout the Lifecycle

Working together, PlanView Enterprise and EMC Documentum eRoom can provide greater visibility into specific benefits throughout the lifecycle. By using both structured portfolio management and unstructured data, managers can better track and display performance on strategies, investments and overall resource utilization.

Enhance Stakeholder Communications and Involvement

Integrated with the intuitive PlanView interface, eRoom is simple to use and easily adaptable to the requirements of different groups. Features like instant or daily notifications, team calendars, project inboxes, hyperlinks and integration with Microsoft Office and other desktop applications encourage much greater stakeholder use, communications and involvement.

Optimize Resource Management

EMC Documentum eRoom capabilities can help resource managers communicate better with project managers to build stronger teams and reallocate resources more efficiently. Audit trails can document the reason why resource changes were made and the impact of the trade-off decision.

Share and Finalize Unstructured Documents

Users are able to save their business files directly to the eRoom workspace for others to view. Powerful, full-text search capabilities help locate and reuse documents and data. As documents are being revised, version tracking maintains a complete history of changes and iterations for each document.

Improve Recordkeeping and Auditability

EMC Documentum eRoom greatly improves the ability of PlanView Enterprise to provide a record of proper governance and compliance. The combination of both structured and unstructured data increases the depth and auditability of records concerning compliance and other issues related to governance.

Enhance the value of portfolios

The business value of PlanView Enterprise portfolios can be greatly enhanced with the addition of unstructured data and improved collaboration. With eRoom, you can improve project visibility, productivity, efficiency, resource management and strategic decision making

Visit www.planview.com/community to learn how PlanView Community powered by eRoom can give you a competitive edge.

PLANVIEW
